Available CAD Draughtsmen & IT Support Engineers ! Highlights of our recommendations

- . Finding good experienced CAD draughtsman & IT Support Engineer can be very time consuming.
- This entire process of selection & appointment is avoided
- . No Capital Investment in Manpower
- . Experienced technical back up available always to keep to keep the working going on without failure
- . Easy and fare agreements, quick turnaround time
- . No hassels applying visas and making labour
- . Sometimes, firms have to pull out work of thin air to keep their CAD people working when they really don't need them.
- This situation is alleviated.
- . No hassles about finding a candidate, Interview processes, visa processing/deposits etc.
- . Guaranteed performance due to technical skills and in-house update trainings
- . No training costs involved for staff
- . No recruitment expenses.
- . Available for short term and project based.

Managed IT Services

Al Suwaidi's Success is based on delivering the solutions and managed services that can transform a business, backed up by a powerful procurement infrastructure, that's the envy of the industry.

Your IT infrastructure is fundamental to the efficiency and competitiveness of your organisation.

Al Suwaidi's portfolio of highly professional, value-added IT services can help you get the best return on your investment and maximise the performance of your IT environment.

Our primary concern is always the performance of your "Business" – not just your IT functions Our staff have a unique blend of advanced technological skills and thorough commercial awareness which extends to all sizes and types of organisations. Alternatively, find out now how we go beyond technology with:

Service in Focus

- **Consult+** Whether you're looking for core operating systems or LANs / WANs, business continuity or virtualisation, security or mobility, our professional consultants can help you define your business and technology objectives, and then design the optimum solution.
- **Deploy+** With Deploy+, you can mitigate the costs and disruption of changes, upgrades and additions to your IT systems and infrastructure, helping you manage transitions in a planned and efficient way.
- **Manage+** is a portfolio of services that gives you as much – or as little – help as you need. From a single system to a complete IT infrastructure, from hardware to software, from on-site to off-site activity, you can choose the level of managed service that you need.
- **Support+** is Al Suwaidi's alternative to a standard manufacturer's break-fix service. Based in Dubai, technical engineers on our City based service desk with direct access to manufacturer spare parts are supported by a nationwide network of local engineers who visit sites and fix equipment within our own SLAs.
- **Train+** With a comprehensive portfolio of training courses and services, Train+ provides advice, guidance and expertise to some of the UAE's leading organisations.

It invents engineers and delivers technology solutions that drive business value and improve the lives of customers. The HP ProCurve range of networking solutions provides a dynamic infrastructure designed to keep up with advancing technology and user needs while protecting business investments.

3Com Corporation is a \$1.3 billion global enterprise networking solutions provider that sets a new price/ performance standard for customers. 3Com has three global brands—H3C, 3Com, and TippingPoint—that offer high-performance networking and security solutions to enterprises large and small.

Cisco Systems is the worldwide leader in networking for the Internet. Cisco hardware, software and service offerings are used to create Internet Protocol-based (IP) networking solutions that allow companies to increase productivity, improve customer satisfaction and strengthen competitive advantage. The Cisco name has become synonymous with the Internet as well as with the productivity improvements that Internet business solutions provide, thanks to technologies for routing, switching, security, content and network management, data centres and virtualised networks.

The leading technology provider to commercial enterprises around the world, Dell offers a complete portfolio of enterprise client products to address a full range of business requirements and customer usage models. From high-performance Dell Precision workstations and sleek Latitude notebooks to next-generation OptiPlex desktops and Dell EqualLogic storage arrays, Dell's enterprise client family integrates some of the latest technologies to deliver outstanding performance, reliability and security.

lenovo

Lenovo is dedicated to building exceptionally engineered desktop computers. Lenovo's business model is built on innovation operational efficiency and customer satisfaction as well as a focus on investment in emerging markets. Formed by Lenovo Group's acquisition of the former IBM Personal Computing Division, the company develops, manufactures and market reliable, high-quality, secure and easy-to-use technology products and services worldwide

Our Commitment

We hold ourselves completely accountable for our initiatives and interactions with all the entities we liaise with, and consistently strive to correct and improve on our means and practices of doing business with all our clients.

Ability to Deliver

Al Suwaidi Group of Companies has proven time and again its ability to deliver.

"Successful strategies do not exist...without successful implementations."

We have the skill sets to address the industry specific challenges for all the organizations we come across including the strategies, the technology enablers, and the organizational alignment.

Our approach is pragmatic, but not simplistic. We understand that companies must be stretched to reach new levels of achievement but also must be cognizant of their own practical limitations for change. We understand that the result of the entire project we undertake will be a well-defined, actionable roadmap on how our corporate clients gets from current state to future state while driving towards the business objectives.

GRAPHIC DESIGN

Our Mission Statement

Our mission statement is upheld with the primary objective of managing a profitable organization, with a systematic work pattern, guided by professionalism at all levels of hierarchy, striving for consistent quality rendering in products and services and ensuring its continual growth with proper strategies to make shifts at proper periodicities

Our Value Parameters:

Honesty:

Our honest beliefs in our transparent and fair practices throughout the organization set the tone for our activities and operations.

Courage:

We promote whistle blowing within our group for practices and operations that may require review and alterations, and align them to our core business ethics at every step of our journey.

Fairness:

Our value of fairness denotes the emphasis we put on giving each and every entity, internal and external, a fair go at their interest within our organization.

Respect:

We foster a culture that endorses respect toward each others views and actions. Our strength lies in giving credit to those among us that contribute towards our performance in every small way.

Trust:

Our belief in our abilities and values makes provides us with an unparalleled competitive edge whereby we strive to achieve our quality and service benchmarks with consistency

Our Business Protocol

Professionalism:

We believe in putting forth our highest levels of expertise and professionalism into all our undertakings, intrinsically and extrinsically. Our professionalism is communicated not only through our interactions with clients, suppliers and associates, but also through our regimented governance of our internal processes such as accounting, marketing, stocking, feedback addressing, etc.

Systematic work flow & order processing:

We continually monitor and improvise our core practices and procedures in order to ensure an efficient and systemized working pattern throughout our group of companies.

Process Transparency:

We seek to maintain a high degree of transparency in all our functions ranging from stocking practices to marketing protocols. This transparency allows us to gain a clear understanding of problems and inefficiencies over the scope of our business.

Accountability:

We hold ourselves completely accountable for our initiatives and interactions with all the entities we liaise with, and consistently strive to correct and improvise on our means and practices of doing business.

Flexibility:

We acquaint and amend our business structure around the requisites of our clientele and accommodate for as much flexibility in our business processes as possible to cater to their demands.

Quality Product and Service Rendering:

We have always believed that the soul of our organization lies in the quality of our products and services. We have well structured parameters set up in every sphere of our business to appraise and assess our quality standards in the various facets of our organization.

Planned and Regimented Growth Structure:

Our growth and expansion strategy is charted aggressively with our core objectives and business competencies in mind by our senior management. We seek to upkeep the momentum we have been able to achieve over the years and forge our successes in our expansion initiatives in the years to come.
